The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5-9 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pollitt et al (WO 98/21159) in view of evidence (product brochures) submitted by applicant on June 1, 2004.

Rejection is maintained with following response.

Applicant's showing in the 1.132 declaration has little probative value since the scope of showing is broader than the actual invention since the amount of each component, a flow enhancing liquid and sand, is not claimed and since claims recite higher amounts of aluminum oxide and ferrous oxide than the showing. Note that the amounts of aluminum oxide and ferrous oxide in Redhill T are very low (0.09 and 0.04%, respectively), but the claim recites a selected maximum of 1.4% and 0.5%, respectively. Applicant failed to show any unexpected result based on at least said claimed maximum amount. Also, Garside No. 21 having 1.71% of aluminum oxide has yielded a good setting time of 2 hours and 45 minute similar to said Redhill T.

Claims 1, 2, 5-9 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pollitt (GB 2,322,630) in view of evidence (product brochures) submitted by applicant on June 1, 2004.

Rejection is maintained with above response.
